Con el presente trabajo, elaborado por un equipo dirigido por el profesor Julio Alcaide Inchausti, la Fundación BBVA pone nuevamente a disposición de los estudiosos y de la población en general materiales de trabajo que permiten mejorar el conocimiento de aspectos fundamentales de la trayectoria económica y social de nuestro país a lo largo de más de un siglo. El objetivo del mismo es proporcionar series enlazadas de las variables demográficas básicas desde la perspectiva de la contabilidad demográfica, en línea con la contabilidad económica que realizan las cuentas nacionales. Para ello, contrastan las series demográficas disponibles, lo que les permite la obtención de resultados coherentes y fiables desde una perspectiva de muy largo plazo. El detalle quinquenal de la información, así como su desagregación provincial, la consideración de distintas características como sexo, edad y nacionalidad, o la distinción entre tres agregados relacionados con la actividad económica (población activa, ocupada y parada), convierten esta publicación en un instrumento de análisis de singular interés desde muy variadas perspectivas.

La trayectoria de Julio Alcaide como estadístico y como analista de los problemas de España es no sólo rica e impecable, sino excepcional. El libro que ahora nos aporta constituye, en cierto sentido, una sorpresa, ya que se aparta de las cuestiones económicas en las que desde siempre ha trabajado, realizando aportaciones impagables. Sin embargo, no debe sorprender. Me consta que siempre mantuvo vivo el reto de profundizar en la evolución de la población española, porque constituye un factor clave para entender la evolución de la economía y la sociedad de nuestro país. Ahora nos obsequia con este nuevo y excelente trabajo realizado en equipo, que con seguridad constituirá una referencia absolutamente obligada para cuantos se interesan por los cambios registrados en España y en sus provincias y regiones a lo largo del siglo xx.
