

ÍNDICE

Presentación.	11
Liposome Technology for Gene Transfer and Therapy	
<i>Salvador F. Aliño</i>	13
Evolutionary Genomics of Vertebrates and its Implications	
<i>G. D'Onofrio, K. Jabbari, H. Musto, F. Álvarez-Valin, S. Cruveiller and G. Bernardi</i>	25
La diversidad del genoma humano: de la enfermedad a la historia genética	
<i>Anna Pérez Lezaun y Jaume Bertranpetit</i>	41
Transgenic Animals as Models for Diseases	
<i>F. Bosch, T. Ferre, L. Gros, P. Otaegui, A. Pujol and E. Riu. .</i>	55
RNA as a Small Molecule Drug Target	
<i>David J. Ecker.</i>	67
Haplotype Analysis and Evolution of Cystic Fibrosis Mutations	
<i>Xavier Estivill</i>	83
Behavioral Genomics: Scientific and Ethical Issues	
<i>Dean H. Hamer</i>	93

8	<i>Compromisos con el futuro del Proyecto Genoma Humano</i> Current Options for the Human Genome Project	
	Human Telomerase Targeted Ribozymes	
	<i>Yoshiyuki Kanazawa</i>	105
	Expression Profiling of Active Genes	
	<i>R. Matoba, K. Kato, S. Saito, Y. Sakakibara, C. Maruyama</i> <i>and K. Matsubara</i>	113
	Xenotrasplante	
	<i>Blanca Miranda</i>	125
	Development of Anti RNA Polymerase I Ribozymes	
	<i>J. S. Norris, B. Hoel, D. Voeks, F. Maggouta, M. Dahm, W. Pan</i> <i>and G. Clawson</i>	141
	Expression Genetics and Early Cancer Detection	
	<i>Arthur B. Pardee, Heide L. Ford and Ruth Sager</i>	151
	The PTEN Tumor Suppressor	
	<i>Ramon Parsons</i>	163
	Brief Review of Human Genomic Diversity	
	<i>Sérgio D. J. Pena</i>	183
	Aplicaciones de la genética molecular en la producción de alimentos	
	<i>Daniel Ramón</i>	191
	Ribozyme-Mediated Cancer Gene Therapy	
	<i>Birgit Anderegg, David A. Henderson and Kevin J. Scanlon</i>	201
	Developmental Genomics and the Analysis of Aging	
	<i>David Schlessinger</i>	211
	Functional Identification and Characterization of MMAC/PTEN: Involvement in Malignant Progression	
	<i>P. A. Steck, W. K. A. Yung, M. A. Davies, D. Koul and S. Jasser</i>	217

The Genome Project: From Man to Microbes	
<i>J. Craig Venter.</i>	227
Gene Therapy: Trials and Tribulations	
<i>I. M. Verma, L. Naldini, T. Kafri, H. Miyoshi, M. Takahashi, U. Blömer, N. Somia, L. Wang and F. H. Gage.</i>	237
Chromonomics: Structure and Function of Natural and Artificial Human Chromosomes	
<i>Huntington F. Willard</i>	253
Vaccinology, Vaccines and DNA	
<i>Maurizio Zanetti.</i>	263
The Future of Gene Therapy	
<i>Odile Cohen-Haguénauer</i>	279
Antisense Therapy	
<i>James B. Wyngaarden and Sudhir Agrawal</i>	297
South-North Integration in Human Genome Re- search	
<i>José María Cantú</i>	303
Biological Microchips: Production, Properties and Application	
<i>Andrei Mirzabekov</i>	309
